EDUCATION

KLE Technological University

B.E. in Computer Science & Artificial Intelligence (CGPA: 8.98)

2024 - Present

TECHNICAL SKILLS

Programming Languages: Python, C/C++, Java, JavaScript (ES6+), SQL

Web & Mobile Stack: HTML5, CSS3, Vanilla JS, Next.js, Node.js, Flutter, REST APIs

Databases & Tools: Supabase, PostgreSQL, MongoDB, SQLite, Git, GitHub, VS Code

PROJECTS

PPES (Prarambha Path Digital Platform)

Next.js, Node.js, Express, MongoDB

- Comprehensive educational management system built for scalable usage.
- Implemented role-based access control (Admin, Faculty, Student) and secure JWT authentication.
- Built automated test generation modules and analytics tracking.

AOTTS (Automated Object Tracking & Targeting System)

Raspberry Pi 4, Python, OpenCV

- Engineered a 3-axis automated tracking mechanism using hardware-software integration.
- Configured servo control systems paired with real-time OpenCV-based object detection.
- Delivered precise, autonomous targeting logic with minimal latency.

AOPS (Advanced Operating System Simulator)

C, C++

- Developed a CLI-based OS simulator demonstrating fundamental operating system principles.
- Implemented critical CPU scheduling algorithms, virtual memory paging, and deadlock handling.
- Created simulated file systems and process management trees in an interactive shell.

ACHIEVEMENTS & CERTIFICATES

- **1st Rank in DAA Hackathon** (Design and Analysis of Algorithms)
