EDUCATION

KLE Technological University

B.E. in Computer Science & Artificial Intelligence (CGPA: 8.98)

2024 - Present

TECHNICAL SKILLS

Programming Languages: Python, C/C++, Java, JavaScript (ES6+), SQL

Web & Mobile Stack: HTML5, CSS3, Vanilla JS, Next.js, Node.js, Flutter, REST APIs

Databases & Tools: Supabase, PostgreSQL, MongoDB, SQLite, Git, GitHub, VS Code

PROJECTS

PPES (Prarambha Path Digital Platform) [\[GitHub Repo\]](#)

Next.js, Node.js, Express, MongoDB

- Comprehensive educational management system built for scalable usage.
- Implemented role-based access control (Admin, Faculty, Student) and secure JWT authentication.
- Built automated test generation modules and analytics tracking.

AOPS (Airline Optimization Path System) [\[GitHub Repo\]](#)

C++ Backend, HTML5, CSS3, Vanilla JS (D3/SVG)

- A graph-theoretical flight path solver modeling global airport nodes as graphs.
- Implements Dijkstra's and Bellman-Ford route algorithms with heuristic optimization (fuel, delay, air-traffic).
- Overcame challenges in visualizing nodes responsively via custom SVG coordinate plots.

AOTTS (Automated Object Tracking & Targeting System) [\[GitHub Repo\]](#)

Raspberry Pi 4, Python, OpenCV

- Engineered a 3-axis automated tracking mechanism using hardware-software integration.
- Configured servo control systems paired with real-time OpenCV-based object detection.
- Delivered precise, autonomous targeting logic with minimal latency.

ACHIEVEMENTS & CERTIFICATES

- **1st Rank in DAA Hackathon** (Design and Analysis of Algorithms)
